

# KOCH MEMBRANE SYSTEMS

## KOCH MEMBRANE SYSTEMS

*Client:*  
Koch Industries, Inc.

*Location:*  
Wilmington, Massachusetts

*Type:*  
Industrial Facilities

*Description:*  
Essex Builders Corp. served as the Design Build/General Contractor for this 43,000 SF, ground-up, hollow fiber filter manufacturing and research facility. The process included; fast-track design, permitting and construction in order to relocate the existing facility. The new facility included improved manufacturing systems designed for long-term flexibility and expansion. A gas-fired HVAC system was installed, as well as a sophisticated R.O., pure water and M.E.P. Systems. Two-tier utility distribution systems were constructed to carry process piping, piped gases, and low voltage electricity designed to provide flexibility for additional equipment and services.

*Design/Build Team:*  
*Architect:*  
Taylor & Partners, Inc.  
Boston, Massachusetts  
*General Contractor:*  
Essex Builders Corp.
