

THE DEWY CENTER FOR ARTS & SCIENCES

THE DEWEY CENTER FOR ARTS & SCIENCES

Client:
Charles River School

Location:
Dover, Massachusetts

Type:
School Facilities

Description:
Essex Builders Corp. served as the General Contractor for the construction of a 6,000 SF building which included; a combination main hall, indoor stage and auditorium, a woodworking and set construction shop, art gallery and a science/laboratory room.

The backstage rooms were erected to open up to an outdoor state and amphitheater designed for children, complete with inner and upper stages. The building's exterior is comprised of a wood frame structure with wood siding and white cedar shingles.

All work was completed while school was in session.

Architect:
Amsler Woodhouse MacLean Architects, Inc.
Boston, Massachusetts
